Boost your Trading Profits with Samson systems

Samson Technologies cc

Expand your business with trusted construction solutions.

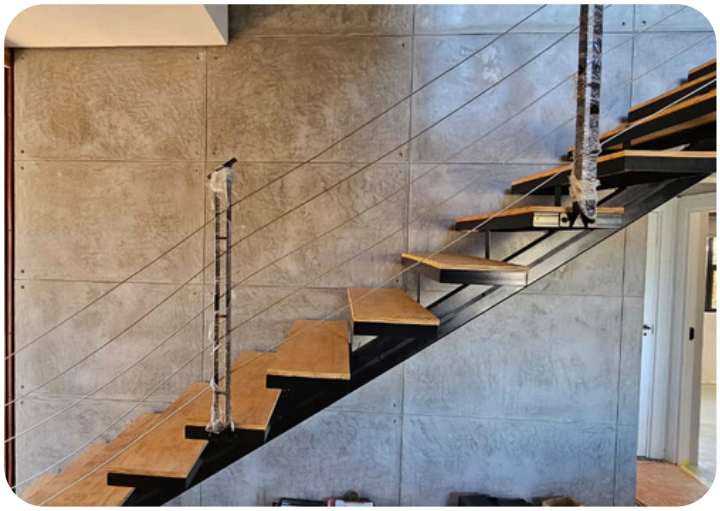

Samson manufactures specialty products for the construction industry and “do it yourself”

At **Samson** **we are seeking distributors, stockists or agents as our route to market for construction products.**

The **Samson** range includes **Concrete floor treatments, Wall coatings and waterproofing, Roof tile, Corrugated Iron, or Asbestos Roof renewal treatments and Concrete Repair materials.**

A unique benefit of the **Samson** system is excellent results without the need for specially skilled applicators.

Profit potential

Samson wishes to enter a variety of agreements dependant on the level of service that each outlet will provide. For example: a distributor is expected to do more marketing than a stockist. A stockist is expected to hold stock where an agent will simply act as a go between Samson and the end user. Samson Marketing Support: Professionally designed leaflets and promotional materials to help you attract customers like our decorative coatings and site guide

Samson has an excellent track record for rapid service and delivery. Delays are often experienced in procurement of construction materials. Unlike many suppliers, **Samson** ensures rapid turnaround — orders are manufactured and dispatched within days if not already stocked

The DIY Market

The **Samson** “Renew” systems are easily applied by a DIY enthusiast. An example of this is where an old run down spare room was turned into a beautiful living space where the enthusiast carefully applied as per the Samson instruction

Samson has systems ranging from repair of walls damaged by rising damp, floor renovation and more. Refer too Samson pamphlets: Roof Renew, floor Renew, Wall Renew. The simples steps are laid out in these pamphlets to guide the DIY enthusiast and contractor to success

OVER 50 YEARS OF
CONCRETE EXCELLENCE
