Excellence in Concrete Technology

Samson Technologies cc

Samson Technologies has a complete range of products suitable for DIY and Cleaning Industry contactors to strip, clean and seal concrete and tile floors.

Cleaning & Stripping:

1. PolyStripper
Softens and removes water based acrylic emulsions from concrete and vinyl tiles. Wash off with water.

2. Stripper A
Suitable for removing curing compounds, rubber tyre marks and oil stains. Requires only water to wash off.

3. Dissolver G.O.
Water based product designed to remove vegetables oils, mineral oils and grease from concrete and tiles through a process of emulsification requiring only water to wash off.

Sealing:

1. Siloxane Solution
Used for water repellency on porous surfaces.

2. MM Sealer Siloxane
For water repellence and prevention of oil penetration. It forms a hard membrane with a satin finish.

3. MM Sealer Buffable
A wax modified version of MM Sealer which enables it to be polished by buffing for a higher shine.

MM Sealer Buffable

4. MM Sealer Combo
This is a combination product specially designed for the sealing and glossing of concrete floors which have been surfaced ground to reveal aggregate.

5. MM Sealer Primer
When a thinner coat of acrylic resin is required. Excellent for water repellency.

MM Sealer Combo

6. HC Densifier
A water based silicate used for dust proofing and densification of porous concrete.

GENERAL :

This information is designed to alert contractors in the cleaning industry to the range of SAMSON products. Before use, SAMSON Technical Services should be consulted for selection of the right product, technical datasheets and installation methods.
